## Eric Vincent Gelinas **Web Interface Developer**

508 E. Palm Ave. Suite: D  
Burbank, California, 91501  
[eric@standardpixel.com](mailto:eric@standardpixel.com)  
(626) 737-6770

### Objective

To pursue a position that will apply and enhance my web standards experience. Focus my understanding of user interaction to create engaging and innovative web interfaces.

### Experience

#### 2004 to Present | Markup Engineer - EarthLink, Inc | Pasadena, Ca

- Led interface development of a Map-based search product. Leveraged Yahoo ui, Prototype JavaScript Framework, and Scriptaculous frameworks to enhance the search and mapping functionality of the Microsoft Virtual Earth API.
- Applied knowledge of Agile development concepts to create a Web 2.0 portal that will replace the current EarthLink web portal.
- Key developer of a social bookmarking site. This application was built using the Ruby on Rails framework. RJS and JSON were used to facilitate an AJAX enabled application of Model-view-controller.
- Ongoing HTML, Javascript, and CSS enhancements to a web portal with a user base of over 4 million subscribers. Optimized images delivered in photoshop format from UI design group. Developed Apache Velocity templates that enable a content management tool.

#### 2001 to 2004 | Production Coordinator - EarthLink, Inc | Pasadena, Ca

- Ongoing HTML, Javascript, and CSS enhancements to the primary marketing site of a national ISP.
- Primary web designer for a web site featuring EarthLink's Eco-Challenge team.
- Led an initiative to create a workflow system to manage content update requests for EarthLink's portal products and improve staff efficiency. Acted as primary developer and server support for a PHP and MySQL-based application.

#### 1998 to 2001 | Technical Support - EarthLink, Inc | Pasadena, Ca

- Supervisor of 11 technical support representatives. Ensured customer satisfaction through direct customer communication and employee development.
- Primary interface developer of a web application suite developed to facilitate communication between 4000 call center employees and corporate communications. This application was developed using ASP and Microsoft Exchange.

#### 1997 to 1998 | Web Designer - Career Explorers, Inc | Chatsworth, Ca

- Designed and developed primary website of a direct mail catalog.

### Training

#### 2005 | Agile Web Development with Rails

Dave Thomas and Mike Clark of Pragmatic Studio

#### 2007 | Scrum Team Training

Trail Ridge Consulting
